Why attend the APNIC 33 Conference?

Registration to the APNIC 33 Conference includes APRICOT 2012 and SANOG 19.

High return on your investment.

The knowledge, live discussions, and skill-building opportunities presented at APNIC 33 will serve an immediate benefit to your organization.

Hands-on training from industry leaders.

Participate in practical and theoretical tutorials, led by high-level Internet operators from around the world.

Excellent value for level of intensive education.

20+ hours of tutorials

Small class sizes. As a specialist event, work with and learn from Internet industry leaders from the Asia Pacific and beyond.

Training

Regional and global experts deliver sessions featuring advanced technical content:

- IPv6 Deployment
- DNS Security (DNSSEC)
- MPLS & Metro Ethernet
- Peering/IXPs
- Internet policy (security, regulation, content management, addressing, etc.)
- Internet Resource Management

APOPS (Asia Pacific Operators Forum)

Listen and learn with operators from across the region and share experiences on the latest issues affecting your business.

Event Highlights

Make connections between business needs and IT objectives.

To be successful in today's rapidly growing market, a strong understanding of the latest Internet developments is essential for business growth.

Networking Events

APNIC Social Events are a fantastic opportunity to establish opportunities for yourself and your organization. Our social events are memorable because they feature local culture, great food, and entertainment.

Women In ICT

This is an informal networking event with open discussions for women in the ICT industry. Some of the topics discussed are:

- Role of women's involvement in Asia Pacific ICT industry
- Challenges of female entrepreneurship
- Opportunities and challenges for women in the ICT industry

Sponsor an APNIC Conference

Sponsoring an APNIC Conference is the best way to exclusively target the region's key decision makers. APNIC Conference delegates are typically executives who run ISPs; are responsible for technology purchases at large corporations; or are influential people within the global Internet community.

Maximize your visibility with this big-budget target audience.
