

NIR SIG Update – APNIC22

7th Sep 2006, Kaohsiung

Chairs: David Chen

Izumi Okutani

Overview

Time:

- 16:00-18:00 7th Sep 2006 (extended 30 minutes)

Attendees:

- roughly 35

Agenda:

- 3 Updates on NIR activities
 - 4 presentations on the review of APNIC fee structure
- <http://www.apnic.net/meetings/22/program/sigs/nir.html>

Updates of NIR Activities

CNNIC

- Statistics, historical resource status in China, future address requirements
- Expected to require 10-15 * /8 by the end of 2012

TWNIC

- Introduction of new staff in IP Department
- Update of TWNIC Open Policy Meeting

IDNIC

- Change of name from APJII to IDNIC, introduction of OPM
- Planning to start a service for small multi-homing assignments

Review of APNIC Fee Structure

- ✦ APNIC secretariat introduced a model of fee review based on “APNIC Membership Fee Structure Proposal Version 1.1”
 - NIRs presented a summary of NIR’s comments for the model
- ✦ 2 other alternative models of fee structure introduced for discussions
- ✦ Details of the models to be introduced later in AMM at “APNIC fee structure discussion”

● Major comments on APNIC Membership Fee Structure Proposal

- ✦ Should discount for developing countries be considered? If yes, to what extent?
- ✦ The new fee should be able to absorb fluctuations in exchange rates and inflations
- ✦ NIR's operational cost should also be taken into considerations in designing the fee model
- ✦ NIR pool and NIR member's pool should not be counted as different types of address space

Outcome of the Fee Discussions

- ✦ No conclusion to support a particular model
 - Continue discussions on the fee wg mailing list
- ✦ Action Item
 - APNIC secretariat will call for a volunteer at AMM to chair the Fee WG
 - Need to have a chair to drive the discussions

An Idea for Future Considerations

- ✦ Can perhaps consider to hold a Separate fee session as in APNIC 21 where all members can participate in future meetings?

A green line starts from a black dot with four white dots inside, curves upwards and to the right, and then loops back to the left.

Questions?

**Many thanks to all the presenters and
those who had participated in the discussions!**
