AMM, APNIC 27
Manila, Philippines

Policy Development Process

Co-chair election

- Two nominees:
 - Ching-Heng Ku
 - David Woodgate
- Congratulations and sympathies to the new Policy SIG Co-chair, Ching-Heng Ku

7 proposals discussed at APNIC 27

- prop-50: IPv4 address transfers
- prop-60: Change in the criteria for the recognition of NIRs in the APNIC region
- prop-63: Reducing timeframe of IPv4 allocations from twelve to six months
- prop-67: A simple transfer proposal
- prop-68: Inter-RIR transfer policy
- prop-69: Global policy proposal for the allocation of IPv4 blocks to Regional Internet Registries
- prop-70: Maximum IPv4 allocation size

Proposals abandoned

- prop-60: Change in the criteria for the recognition of NIRs in the APNIC region
- prop-63: Reducing timeframe of IPv4 allocations from twelve to six months
- prop-70: Maximum IPv4 allocation size

Proposals withdrawn by authors

- prop-67: A simple transfer proposal
- prop-68: Inter-RIR transfer policy

In favour of prop-050 as modified by consensus at the meeting

Action items on consensus proposals

pol-027-001: Pending approval at each remaining stage of the policy development process, the APNIC Secretariat to implement prop-50, "IPv4 address transfers" based on the revisions below:

- APNIC will process IPv4 address transfer requests involving current account holders following the adoption of this proposed policy, subject to the following conditions:

- The minimum transfer size accepted will be a /24.
- APNIC is to maintain a public log of all transfers.
- Address transfers should be permitted between APNIC account holders and NIR members, if and when individual NIRs implement the transfer policy.
- Address transfers are permitted between APNIC account holders and other RIR account holders, following the policies of all the respective RIRs.
- This proposal to take effect as soon as the APNIC Secretariat can implement the mechanisms of the policy.

Action items on consensus proposals

pol-027-002: Pending approval at each remaining stage of the policy development process, the APNIC Secretariat to implement prop-69, "Global policy proposal for the allocation of IPv4 blocks to Regional Internet Registries" with the following clarifications:

- The minimum size for redistributions by IANA to be explicitly documented
- Examples of how IANA would redistribute space to the RIRs to be added
