

V6 DAY - BEFORE AND AFTER

KUO-WEI WU
ICANN/NIIEPA
2011, 08, 29

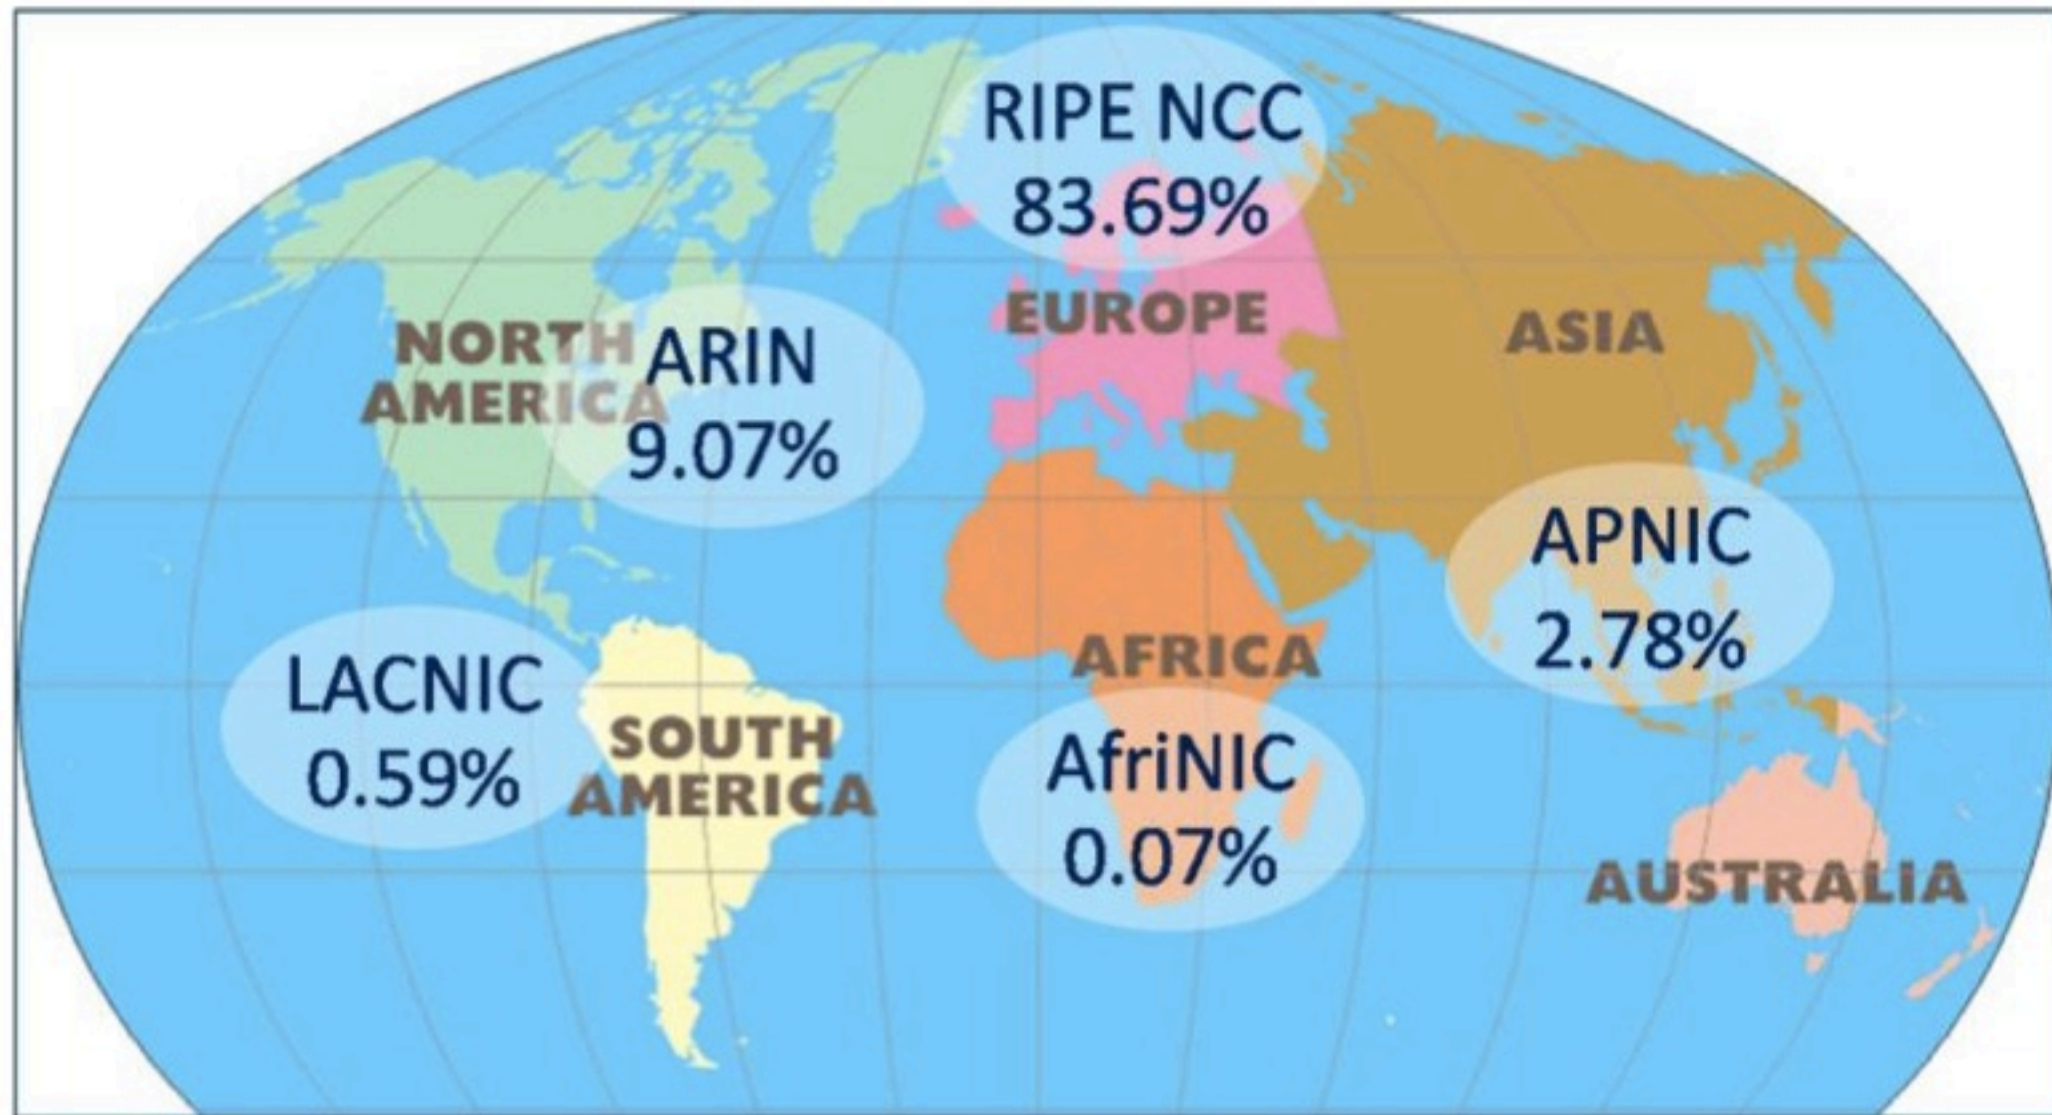

METHODOLOGY

- Take one million most popular Alexa web sites as a base once a month
 - also tried v6 day (June 8th) and day after (June 10th)
 - after v6 day, take the data once a week
- does the web site provide v6 service?
- check the v6 address (based on RIRs blocks)
- We can generate two slides:

WHAT THE INFORMATION TELL US?

BY REGION AND TIME

	2011/6/8	2011/6/10	2011/6/17	2011/6/24	2011/7/18	2011/8/3
APNIC	13,163	235	244	248	257	261
ARIN	816	853	850	856	859	852
AfriNIC	8	3	9	11	8	7
LACNIC	46	47	49	52	51	55
RIPE NCC	4,772	4,837	4,945	5,015	7,674	7,864

WHAT HAPPENED?

- >10,000 sites from AP region joined the v6 day. but why they turned off after v6 day?
- Europe is the leading region in v6 deployment
- Any lesson learned?
